

# Paul Calvert

“The late Paul Calvert was an Orthopaedic Surgeon at St. George’s Hospital in London. He was Chairman of the SAC from 2000-2002 and during that time he was instrumental in starting work on the orthopaedic PBAs which have only been modified in format and very little in content since then. He was voted ‘Trainer of the year’ by BOTA during his time as SAC chairman. Sadly he became ill towards the end of his term of office and died in early 2004. He was an admirable colleague in all ways and is much missed by all he came into contact with. His contribution to this project however remains.”
