Personal notes

Brought up just outside Dundee, Scotland. Qualified St Andrews Medical School (then combined with Dundee Univ) and qualified 1972. Worked in Nottingham, Derby, Newcastle, Gateshead, Nottingham, Toronto and Manchester (Hope Hospital) before being appointed Professor of Orthopaedic & Accident Surgery, University of Nottingham in 1985. NHS work initially at Queen's Medical Centre (trauma) and Harlow Wood Orthopaedic Hospital (elective) which closed in 1995 and I then moved to the Shoulder & Elbow Unit at Nottingham City Hospital. My outside interests are woodworking, Narrow Boat cruising and computers. I'm married with one daughter, two sons, three grandchildren and more on the way.

Published work

Shoulder surgery, osteoporosis, medical informatics, biomechanics and Sports Medicine

Essence of practice

Elective is predominantly shoulder & elbow Surgery including arthroscopic surgery. My practice has now become 30% tertiary referral with very complex revision shoulder & elbow surgery. I still do some general orthopaedics including hip and knee replacement in my NHS practice only. I maintain a strong interest in shoulder trauma.

Expectations of trainees

I'm looking for trainees who	I am irritated by trainees who are
Want to become good shoulder & elbow surgeons but also wish to understand conservative treatment and non-operative outcomes.	Not prepared to read up operations before coming to the operating theatre & Do not spend sufficient time in the Skills Lab developing their surgical skills.
